**SPRINT 8:** The SPRINT 8 program is an anaerobic High Intensity Interval Training program designed to build muscle, improve speed, and naturally increase the release of Human Growth Hormone (HGH) in your body.

**DISTANCE:** Push yourself and go further during your workout with five distance workouts. Choose from 1K, 5K, 10K, half marathon, marathon.

**CALORIES:** Set goals for burning calories with three workouts. Choose from 300, 500, 700. User sets starting speed and incline levels. Calories burned are calculated using weight input of user profile.

**INTERVALS:** An effective fat-burning workout that helps you improve your fitness level. Choose from speed intervals, peak intervals, endurance intervals.

**PERFORMANCE:** Include Weight Loss and Gerkin. Promote weight loss by increasing and decreasing the speed and incline, while keeping you in your fat burning zone. And Gerkin Protocol tests cardiopulmonary health.

**STEPS:** Promotes healthy activity with 2 step-based workouts calculated using average stride length. Choose from 5000 and 10000 step workouts. User sets starting speed and incline levels.

### HEART RATE ZONE INCLUDES TARGET HR, % TARGET HR:

A workout designed to keep you in your specified heart rate zone. This workout requires you to wear a wireless heart rate strap.

### TARGET HEART RATE:

The first step is knowing the right intensity for your training is to find out your maximum heart rate (max HR=220-age). The age-based method provides an average statistical prediction of your max. HR is a good method for the majority of people. Take 30 year old person for instance, the max HR is 220 - 30 = 190 bpm. So 190 bpm is the target of this program, incline ranges very automatically based on your heart rate changes during workout.

### % TARGET HR:

There are 3 percentage values can be chosen, %55 (weight management and active recovery), %70 (moderately long workouts) and %85 (fit persons and for athletic training). Target heart rate is calculated by (220-age)\*%HR, for example 30 year-old person would like to take the weight management and active recovery (%55), target heart rate is (220-30) \* 55% = 105 bmp.

Heart Rate	Incline Function	Incline Very
20+ under target	Increase every 10 seconds	0.50%
6-19 under target	Increase every 35 seconds	0.50%
+/- 5 of target	No change	0
6-19 over target	Decrease every 35 seconds	-0.50%
20-24 over target	Decrease every 10 seconds	-0.50%
25+ over target	Program stop	Console reset
